

## Testimonial

Sensory Taekwon-Do instructors brought a fantastic martial arts experience to the students at Park Academy this school year. The are passionate, kind, and caring instructors who understand the special needs of our student population. They gently encouraged the students to participate in Tae Kwon Do exercises that helped to regulate their bodies and minds. The students enjoyed the physical and emotional benefits of martial arts practice and the classroom teachers saw a marked improvement in the students' ability to focus and learn after participating. Most notable was the students' interest in continuing Tae Kwon-Do practice after the conclusion of the 10-week course. We were pleased to offer this alternative martial arts program to your students with ADHD, ASD and other social and emotional difficulties.
